American Wireless Alarm, Inc.

NEW AWAI
MD Series

MD 2.0

Equipped with Human and Vehicle Classification Technology
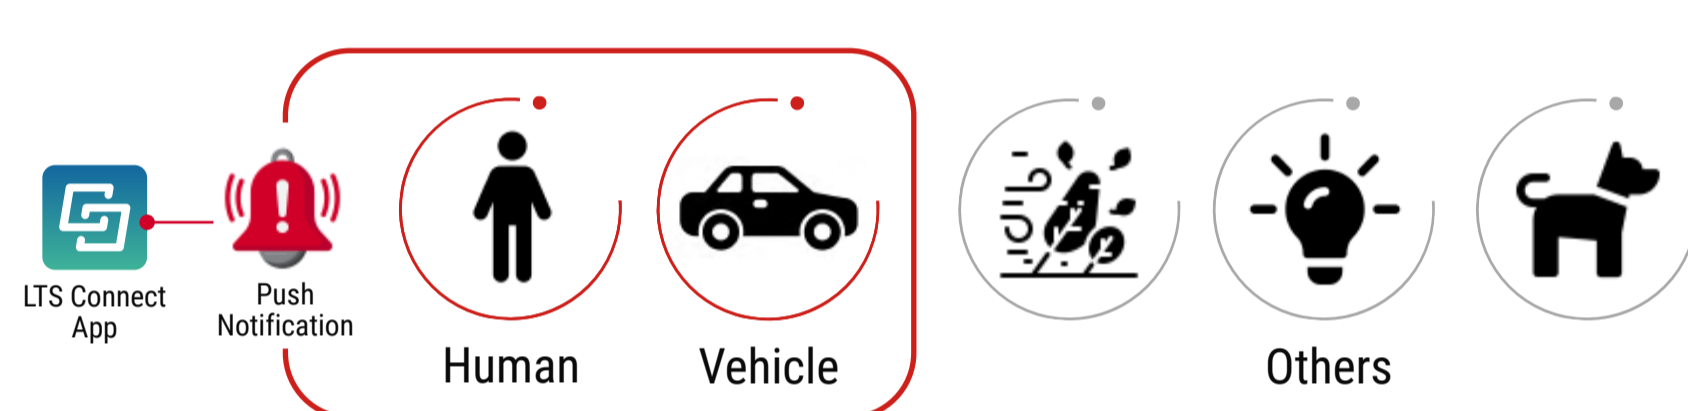

LTS

AWAI CCTV

PRODUCT FEATURES

Motion Detection 2.0

Sensitive and Accurate

Our new AWAI -MD and -MDA models are built to document all events, and to pinpoint human and vehicle activities while filtering false motion alarms caused by animals or strong weather.

When important events are triggered, instant push notifications will be sent through the LTS Connect app.

Detection with Target Classification

LTS Connect App   Push Notification   Human   Vehicle   Others
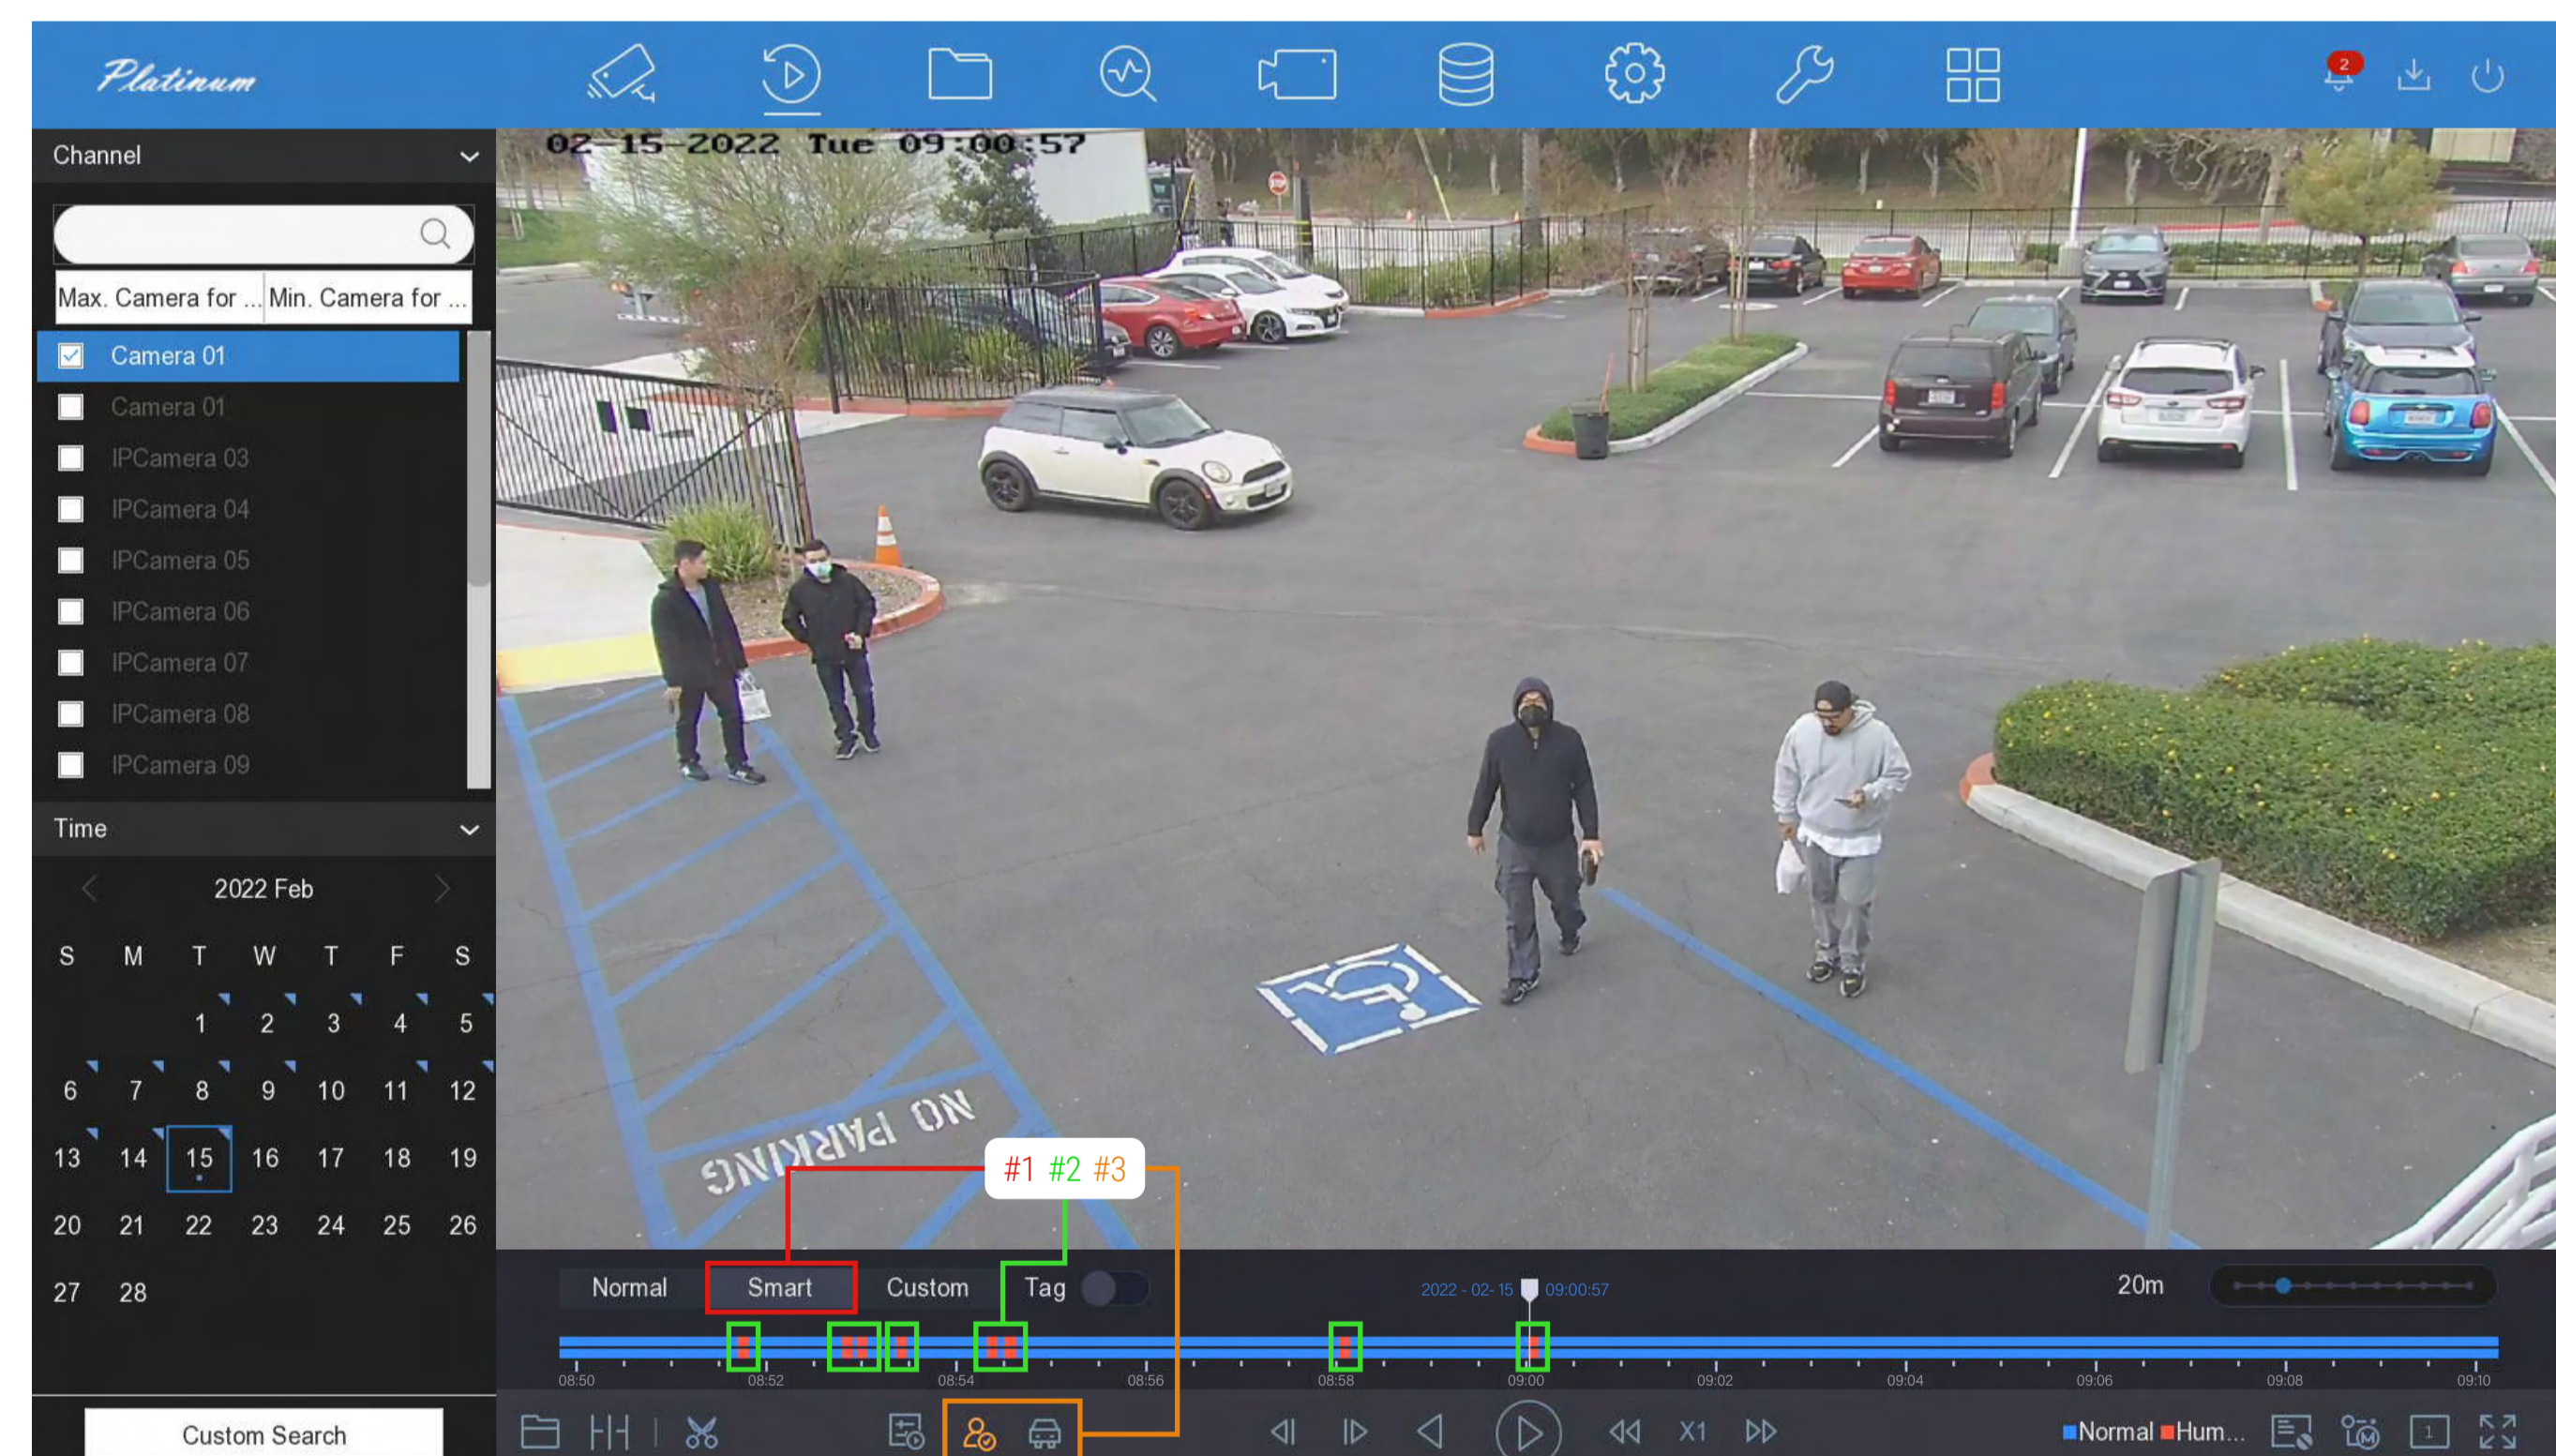

Easy to Use, Easy to Choose

Fullscreen, regular motion and human/vehicle detection are enabled by default, making IP camera setup easier and smoother than ever.
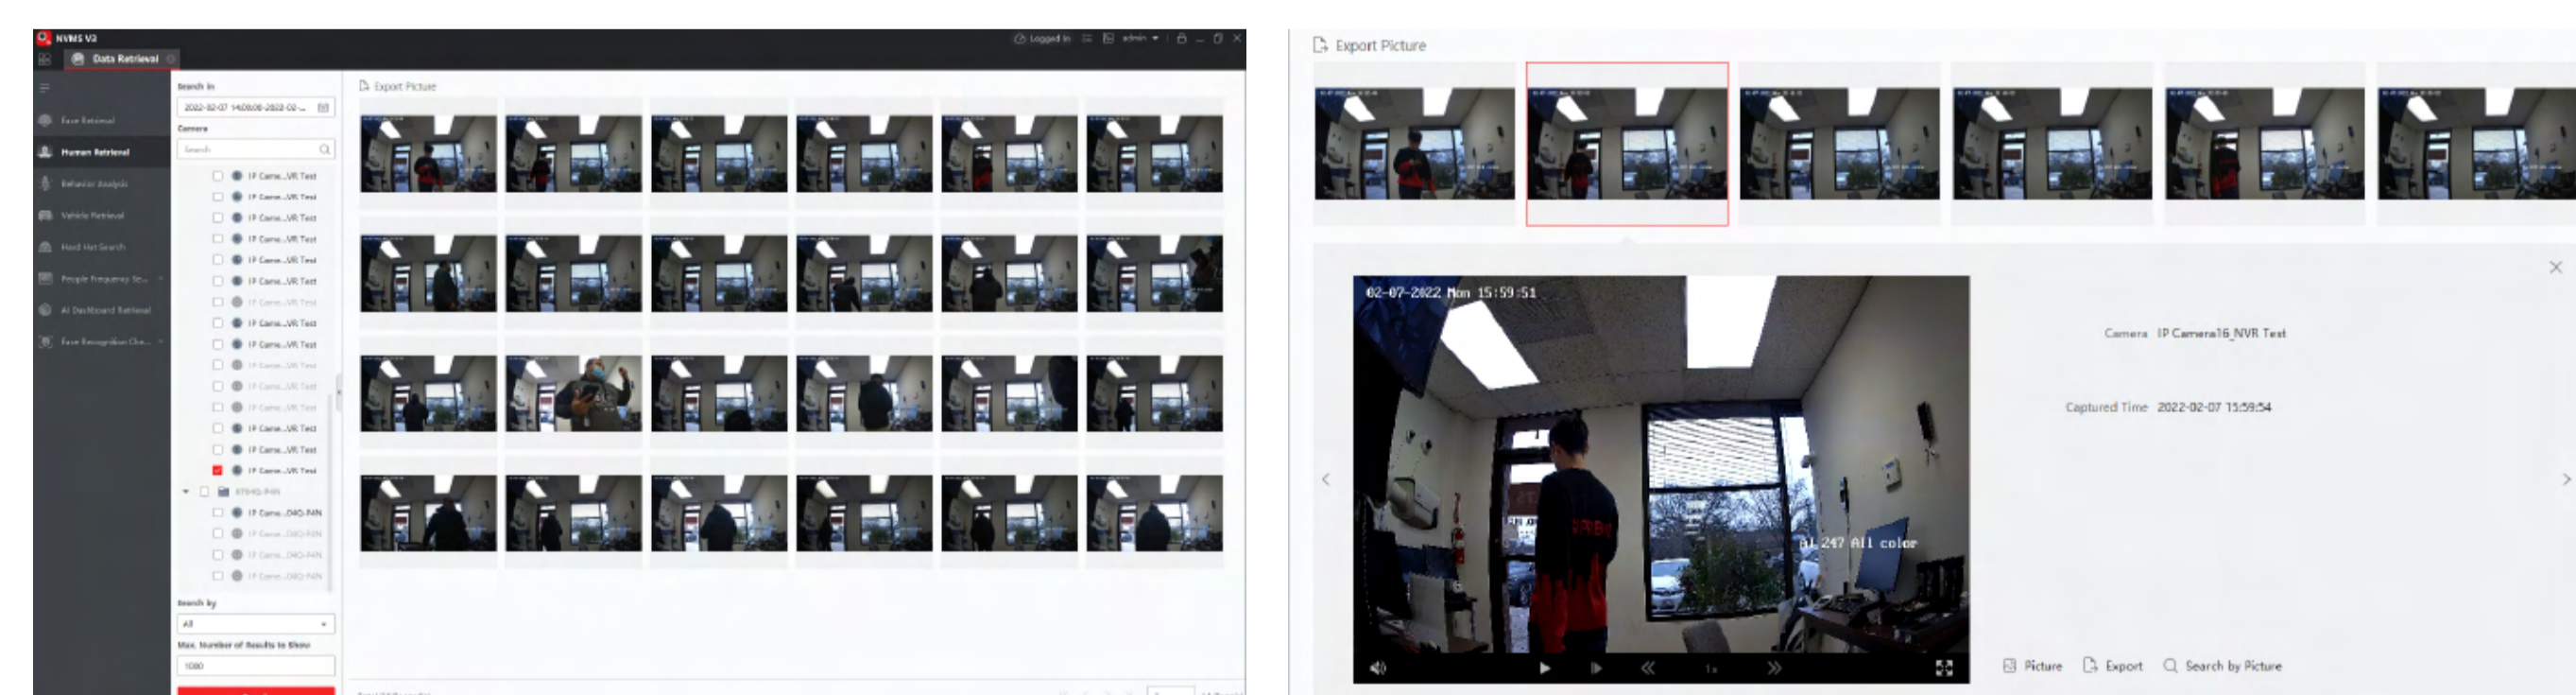

Streamlined Playback Analysis

Human and vehicle detection can be separately enabled to suit user needs, and our models come with an option to skip any irrelevant footage on the local menu. Users can also filter their searches for human and/or vehicle activities.

1) "Smart" Playback Tab
2) Markers Indicating Human/Vehicle Detection
3) Enable/Filter Human and Vehicle Detection
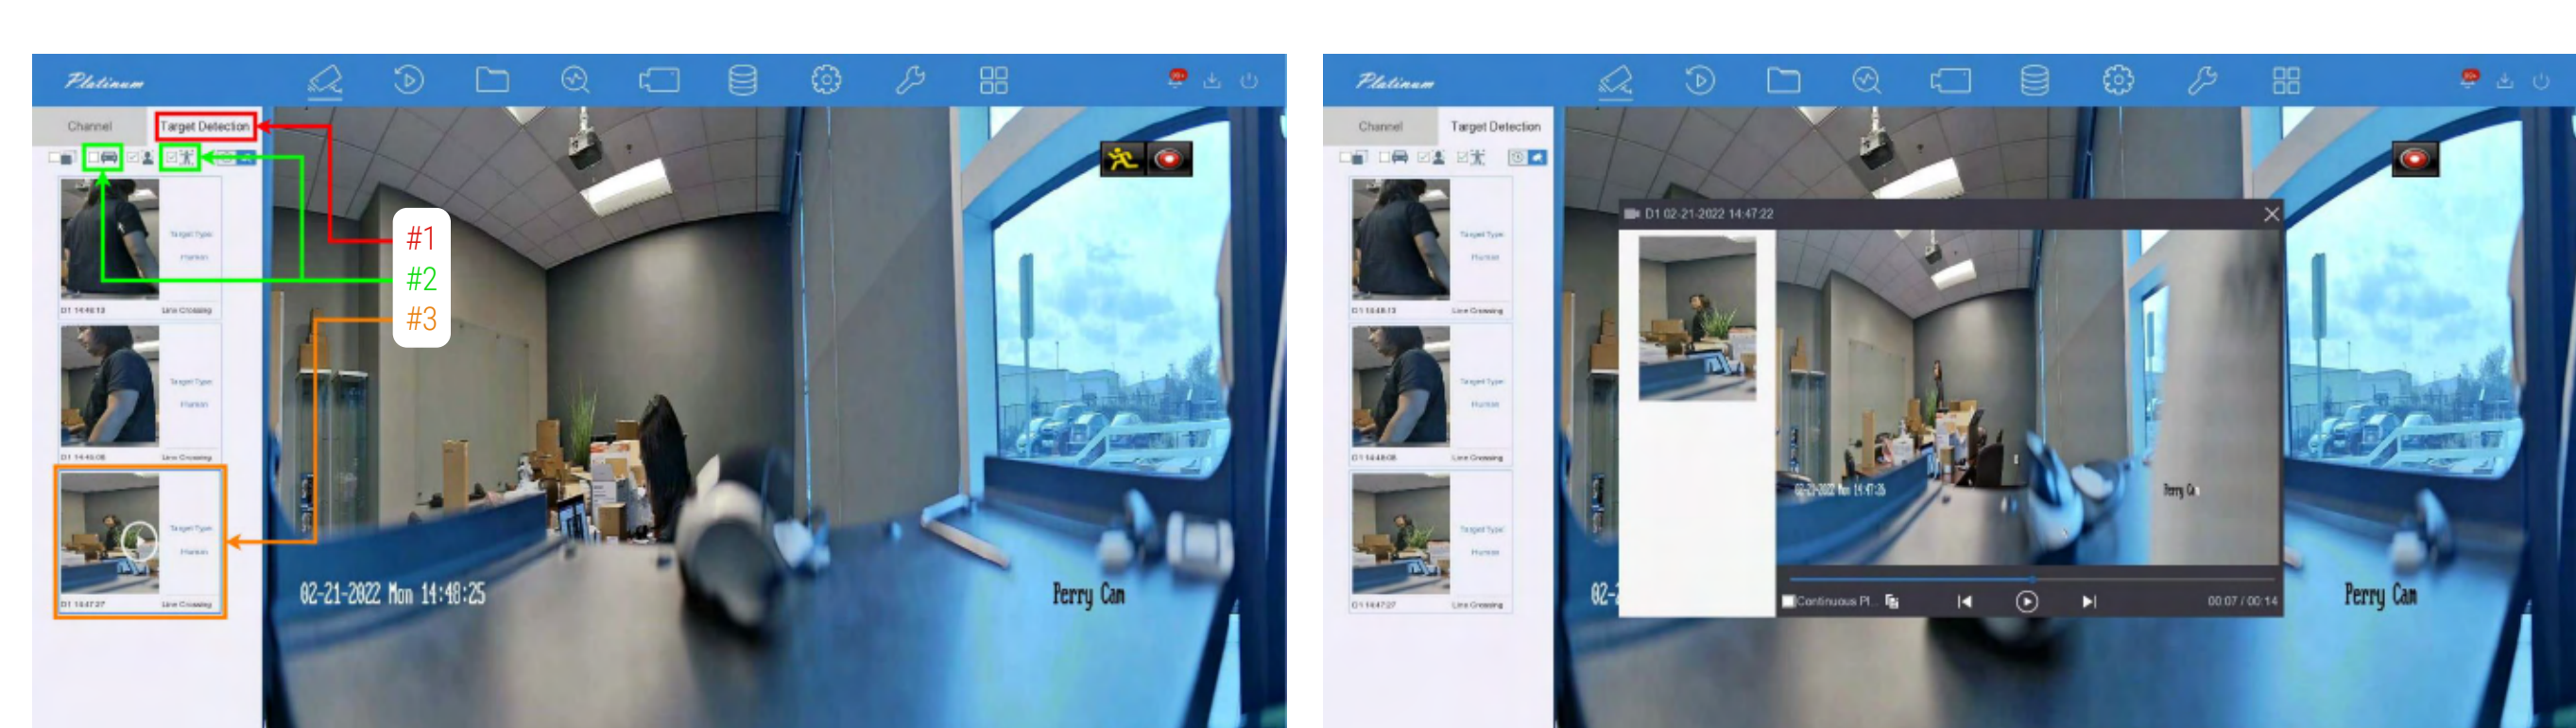

NVMS V3 Data Retrieval

Efficiently retrieve and import footage with human and/or vehicle activities using NVMS V3 software from different cameras placed in multiple locations.

1) Find snapshots through software.   2) Export the footage you need.

Target Detection

With AWAI Enterprise Level NVRs, human/vehicle detection can be shown through Live View in snapshots, and the playback can be easily accessed with one click on local monitors.

1) "Target Detection" Tab
2) Enable Human/Vehicle Detection
3) Live View Pop-Up Selection
